Duration	4 mins 22 secs
Grade	**14.00** out of 15.00 (**93.33**%)

Question **1**

Correct

Mark 1.00 out of 1.00

In binary search, if the target element is less than the middle element, where does the search continue?

a. In the right sublist
b. In the left sublist ✓
c. At the beginning of the list
d. In the entire list

Question **2**

Incorrect

Mark 0.00 out of 1.00

Which method of searching involves sequentially comparing each element until a match is found?

a. Hashing
b. Binary search ✗
c. Jump search
d. Linear search

Question **3**

Correct

Mark 1.00 out of 1.00

Which of the following best describes the process of a linear search?

a. Sorting the list before searching
b. Checking each element sequentially ✓
c. Dividing the list in half repeatedly
d. Skipping every second element

Question **4**

Correct

Mark 1.00 out of 1.00

What is searching in the context of computer science?

a. Inserting elements into a list
b. Deleting elements from a list
c. Determining whether an element is present in a list ✓
d. Sorting elements in a list

Question **5**

Correct

Mark 1.00 out of 1.00

What is the time complexity of binary search in the worst case?

a. O👎
b. O(log n) ✓
c. O(1)
d. O(n log n)

Question **6**

Correct

Mark 1.00 out of 1.00

What type of search would be most appropriate for finding an element in a list that is frequently updated?

a. Interpolation search
b. Hash search
c. Linear search ✓
d. Binary search

Question **7**

Correct

Mark 1.00 out of 1.00

Which of the following scenarios is best suited for applying binary search?

a. When the list is unsorted
b. When the list is very small
c. When the list contains duplicate elements
d. When the list is sorted ✓

Question **8**

Correct

Mark 1.00 out of 1.00

Which of the following is a conventional searching technique?

a. Hashing
b. Binary search
c. Dynamic search
d. Linear search ✓

Question **9**

Correct

Mark 1.00 out of 1.00

Given an array arr = {45,77,89,90,94,99,100} and key = 99; what are the mid values(corresponding array elements) in the first and second levels of recursion?

a. 89 and 99
b. 90 and 94
c. 90 and 99 ✓
d. 89 and 94

Question **10**

Correct

Mark 1.00 out of 1.00

Which of the following is not a limitation of binary search algorithm?

a. Must use a sorted array
b. There must be a mechanism to access middle element directly
c. Requirement of sorted array is expensive when a lot of insertion and deletions are needed
d. Binary search algorithm is not efficient when the data elements more than 1500 ✓

Question **11**

Correct

Mark 1.00 out of 1.00

In a linear search, how many comparisons are made in the worst-case scenario to find an element in a list of size n?

a. n ✓
b. log n
c. 1
d. n/2

Question **12**

Correct

Mark 1.00 out of 1.00

In linear search, if the target element is not found in the list, what is the result?

a. The last element is returned
b. The search is considered unsuccessful ✓
c. The first element is returned
d. An error is raised

Question **13**

Correct

Mark 1.00 out of 1.00

What is the time complexity of linear search in the worst case?

a. O👎 ✓
b. O(n log n)
c. O(1)
d. O(log n)

Question **14**

Correct

Mark 1.00 out of 1.00

If the target element is greater than the middle element in binary search, where does the search continue?

a. In the middle of the list
b. In the right sublist ✓
c. In the left sublist
d. At the beginning of the list

Question **15**

Correct

Mark 1.00 out of 1.00

Finding the location of a given item in a collection of items is called

a. Finding
b. Searching ✓
c. Discovering
d. Mining
